Mono Laser Copier/Printer

TAKE A LEAP INTO DIGITAL

SHARP *DOCUMENT* SOLUTIONS

COMPACT AND POWERFUL OFFICE SOLUTION

Speedy Copy and First Copy Time

The AR-5316 and AR-5320 have a quick first copy time of 7.2 seconds to save valuable time when performing multiple short-run jobs. And with a continuous copy rate of 16 cpm and 20 cpm (A4), you can do more copy jobs in less time.

Scan Once Print Many

The AR-5316 and AR-5320 come standard with a Scan Once/Print Many function that stores a scanned original into memory to quickly produce up to 999 copies of each page.

Superb Image Quality

High performance with 600dpi resolution and 256-level greyscale ensures finely detailed reproduction. Digital Auto Exposure Control provides optimum copy contrast, and Text/Photo mode automatically distinguishes between photos and text in the document and adjust the copy contrast for the best results.

Digital Image Editing Functions

Wide Zoom Range

Thanks to the digital image process, these compact engines can be equipped with a wide zoom range from 25 to 400% that can be adjusted in 1% increments.

XY Zoom

Enjoy the freedom of setting the horizontal and vertical ratios independently with the XY zoom function.

B/W Reverse

Reverses any black on white image to white on black with simple operation.

Automatic Document Feeding

The optional Single Pass Feeder (AR-SP6) eliminates the tedious task of placing pages by hand and allows you to automatically make one set of a copy from a stack of up to 40 originals.

Dual Page Copy Mode

The dual page copy mode automatically copies both pages of an open book, a magazine or an A3 document onto separate A4 sheet.

* Not available when using the optional document feeder.

OTHER KEY FEATURES

- Toner Save mode (copy only)
- Copy auditing (20 accounts)
- Automatic paper selection
- Automatic magnification selection

Standard Host-Based Printing

The AR-5316 and AR-5320 supports hostbased printing, enabling it to print out documents at up to 12 ppm. And with Fit-to-Page, N-up printing, Watermarks and other features you would expect to find only on higher-end multifunction products, you can save time and paper and give your documents a professional look.

Printer Status Windows

Printer Status Windows conveniently allow you to monitor important printer information on your PC, including on-line/off-line status, name of the active print job, and machine conditions such as amount of paper or toner.

Smart Sharing

The AR-5316 and AR-5320's Smart Sharing function allows you to connect multiple computers directly to the machine without having to go through a network. This is great news for small workgroups that need to share the unit with only a few PCs and don't have a LAN set up in their office. One USB 1.1 port and one IEEE 1284 port are provided as standard.

FEATURES AND BENEFITS

The AR-5316 Control Panel

Intuitive Control Panel

The sophisticated functions of the AR-5316 and AR-5320 are simply accessed via the easy to use control panel.

More Room in the Office

You will find that the AR-5316 and AR-5320 each maximise features while taking up only a small footprint. Their internal paper trays eliminate the need for a protruding output tray. And placement is easy; the flat sides and compact size let you place it where a conventional copier could never go.

Energy-Efficient Design

To keep energy consumption to a minimum, the AR-5316 and AR-5320 are equipped with two power saving modes. The Auto Power Shut-Off mode minimises energy and the Pre-Heat mode switches off only the heat-roller to reduce power consumption.

Printing on Demand

The AR-5316 and AR-5320 come as standard with printer functionality making light work of your printing demands.

Extensive Paper Supply

The AR-5316 comes with standard paper supply of 350 sheets. The AR-5320 has a standard paper supply of 600 sheets.
